GROUND AND SOARING

# FLYING SCHOOL FOUNDATION PROFILE

2026

# WHO WE ARE

## GROUNDED AND SOARING

The Flying School Athletics Foundation is an athletics development organization with a focus on cross country, road running, and track and field. Our focus is on athletes from 5 years of age through a tertiary level. We look after the children when it comes to social injustices, introduce them to athletics, and help them get into tertiary athletics and professional clubs.

We are currently based in Pretoria North and would also like to have trainers in all major townships of Pretoria and Johannesburg. We offer athletics coaching primarily in running and would like to expand to other codes with additional coaches. We are committed to working with schools, particularly schools with poor athletic performance, to identify, develop, and promote talent.

We want to raise awareness about making athletics a viable career option and extracurricular activities as an alternative to existing social constraints.

## OUR MISSION

To inspire, develop, and empower young people through structured athletics programs that promote physical health, discipline, teamwork, and personal growth. Additionally, we offer support to athletes who want to pursue athletics as a career.

## THE OPPORTUNITY

Youth in our communities face limited access to safe, structured athletics programs. With rising concerns around inactivity, substance abuse, mental health, and social isolation, athletics offers a powerful tool to build resilience, confidence, and community.

## OUR IMPACT SO FAR

- Engaged youth in weekly training, time trials and mentorship
- Reached regional championships in road and cross-country championships
- Produced several podium finishes across multiple competitions.
- Obtained support in the form of shoes and sports bras for our current circle of associates.

# OUR LEADERSHIP TEAM

We have a team of six from diverse backgrounds who work together to make the academy a success.

## THE COACHES

We currently have two coaches; An ASA Level 1 and another Level 2 to scale what we have already done and create structures to enable growth. We had several athletes among us who had already reached national and regional levels.

# OUR OFFERING

The Flying School Athletics Foundation relies on donations, sponsorship, and fundraising to implement and develop our community-based projects. We also welcome volunteers who have time and expertise as needed. As our foundation is a registered NPO; Registration Number: 303-624, we offer partnerships with companies and individuals to invest in a sustainable program that uses sport as a vehicle for social change or that aims to bring about active lifestyle and fitness education activities.

We also offer to those who want to bring their company's brand and product to the mass market through sports. Our organization offers both CSI and marketing opportunities, whether companies want to promote their brand to the mass market or are looking for meaningful CSI spend. We are looking for partners, supporters, and donors who share our passion for using sport to transform the lives of South Africa's children.
